Results-driven Computer Science undergraduate with a solid foundation in software design, development, and modern programming languages such as JavaScript, Java, and Python. Eager to contribute as a Software Development Engineer Intern by leveraging technical proficiency, analytical thinking, and collaboration skills to support innovative solutions within a dynamic corporate environment.

SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS

Databases: PostgreSQL, MongoDB

Frameworks & Libraries: MERN Stack (MongoDB, Express.js, React, Node.js), Django, Chakra UI, Zustand

Tools & Platforms: GitHub, Visual Studio Code, Vercel, Render, Railway, Vite

Areas of Expertise: Full-Stack Web Development, Database Management, RESTful APIs, Version Control, Cloud Deployment, AI

EDUCATION

Evergreen Valley College

Expected: December 2026

Major: Computer Science

SOFTWARE PROJECTS

Bank Customer Churn Predict Python, JavaScript, Docker file, Kaggle, Fly **March 2025 – Present**

<https://bank-customer-churn-prediction.fly.dev/>

Built a **machine learning web app** to predict based on demographic and related features.

- Developed and trained a classification model using the Kaggle dataset
- Deployed the full-stack application on Fly.io, delivering an end-to-end AI solution from data acquisition to cloud-hosted prediction service.

Product Store MongoDB, Express, React, Node, Render **March 2025 – Present**

<https://product-store-1-t0g5.onrender.com/>

Built a **MERN stack web app** with full CRUD functionality for managing store products.

- Developed a full-stack web application enabling users to create, update, delete, and view store products using the MERN (MongoDB, Express.js, React, Node.js) stack.
- Built and deployed a scalable backend with Express.js and Node.js, and hosted the application on Render for live access.

Tarot reading Django, Database, Render **March 2025 – Present**

<https://tarot-y300.onrender.com>

Built a **Django web application** to showcase store items, manage customer feedback, and handle bookings.

Designed and integrated a **database** for efficient storage of products, feedback, and booking data.

- Developed a full-stack web application using Django to streamline both frontend and backend implementation.
- Integrated a relational database to store and manage card reading information securely.
- Deployed the website on Render for reliable and accessible hosting.

Tax calculator JavaScript, CSS, HTML, Vercel **February 2025 – Present**

<https://income-tax-calculator-kohl.vercel.app/>

Built a **JavaScript website** that allows users to calculator user's tax

- Implemented interactive frontend functionality using **JavaScript**, **HTML**, and **CSS** for real-time calculations.
- Deployed the application on **Vercel**, ensuring fast and reliable access across devices.

Soft Skills

Highly motivated and accountable professional with strong communication, problem-solving, and teamwork abilities. Demonstrates excellent time management, adaptability, and attention to detail, with a proven ability to work independently or collaboratively in dynamic environments.
